Q2. National Hydrogen policy? (I said sorry ma'am, I'm unable recall exact provisions and i will read about it). Still, if u feel comfort, I want to ask some question on this? (Ma'am, I don't want to bluff, so I'm not comfortable on this area).

(I said my academic background aligns mostly to IFS and I put my last 5 years of energy in IR as a part of my HIGHER EDUCATION and now by giving IFS AS FIRST choice, I'm searching for opportunity where I can utilise my knowledge of specialisation to protect country interest in foreign land and foreign policy and give back society in better manner and also it helps in my career growth) Member countered my answer by asking that u making contradictory opinions that earlier u said ur research helps in any civil services and now ur tilting towards IFS? (I gave clarity to her that earlier answer based on general utility of research experience in services and now my answer is how exactly my academic background aligns to IFS choice). She smiled
